OBJECTIVE

Data Science and Machine Learning Practitioner with real life experience as a virtual intern, seeking for a kickstarting job for the role of Machine Learning

EDUCATION

Bachelor of Technologh, SVVV

Expected 2023

Relevant Coursework: Computer Science

Higher Secondary Education, Angel Hearts Academy

2018 - 2019

SKILLS

Technical Skills

Python, React Native, C++, SQL

Soft Skills

Intermediate Communication Skills (English)

EXPERIENCE

ML intern

Ineuron

Aug 2021 - Sept 2021

Bengaluru, INDIA

- Project is to build the Phishing Domain Detector in which we've to detect the link or URL is valid or not.

PROJECTS

Artify. In this, Me and my team created a multi-platform art selling application with the help of React native and expo. We've created platform for all artists to sell their art and My role is to implement the ML model to detect the sensitivity of image user is posting.

Travel Price Prediction In this, I've created a model to detect that the traveler should buy the package or not.

Short ML projects. [My Repo](#)
